

Americase®

AVIATION MROs & OEMs

Americase designs and manufactures custom, reusable ATA 300 Specification Category I & II cases for a variety of uses across the aerospace industry. Each is produced to individual airline specifications, so you know your case designs keep your unique needs as the highest priority.

MROs & Spare Parts

Our individualized container solutions help you achieve your goals, whether it's the safe transportation of a critical part or a secure method for storing materials in non-ideal conditions.

ATA-Specific Cases

Our extensive experience working within the parameters set forth by the ATA helps us understand what each ATA-regulated case requires to get the job done and last in the field for years.

Lightweight Aluminum

Our ATA-300 cases are made from aluminum, providing lightweight solutions to ensure best strength-to-weight ratio, reducing fuel usage, and improving your profits.

Flexibility to Meet Your Needs

Full design & build capabilities to engineer custom containers for your unique requirements.

Proven Reliability for Peace of Mind

Each case is meticulously designed and exhaustively tested by our in-house labs to meet the highest standards to ensure your products arrive safely.

Time & Cost Savings

Our case designs allow for easy on-site repair, minimizing downtime and leading to a longer lifetime in the field.

Providing **INNOVATIVE SOLUTIONS**
to complex problems

Americase®

Americase works closely with your commercial aviation transport and storage experts, ranging from purchasing and supply chain to hazmat and maintenance personnel, to ensure your custom-designed cases exceed industry standards and maximize ROI. Aerospace MROs and spare parts vendors trust our top-of-the-line custom job boxes, ULD containers, and fly away kits to protect their mission-critical cargo from every angle.

SOLUTIONS

We custom engineer and manufacture our solutions specifically to fit your unique needs. Our containers are designed to your specific use cases, protecting your cargo while adhering to even the strictest government-use regulations.

100% Custom built to fit your specific application

Durability to Protect Your Investment

Constructed with rugged aluminum to keep the containers lightweight with fully welded, reinforced construction for maximum durability, protection, and field life longevity.

Custom Designed to Fit Your Specs

Engineered and manufactured to fit individual commercial airline specifications.

Flexibility & Versatility

Flexible available configurations to create custom containers for any part or need.

Easy to Use

Each case can be lifted either by hand, or via engine hoist, forklift, overhead crane, or bucket truck, depending on the weight.

With 50+ years of case design and manufacturing experience, a full in-house design and engineering department, precision fabrication, and one of the best production units in the industry, we offer the solutions to complex problems and capability to overcome any challenge.
