

BATTERY BOX

The Battery Box is a custom containment solution for cost-effective and safe shipping of volatile lithium-ion and DDR batteries. Americase's Battery Box is a result of years of research, development, and continuous distribution through multiple recall and recovery events in partnership with some of the biggest consumer electronics companies in the industry.

- ✓ **Sized to Fit Your Products.** Any battery size up to 36 kg and under 1,500-watt hours. If you need a larger weight capacity, we can develop and test the solution that fits your requirements.
- ✓ **Time Savings.** Manufactured in-house for fast turnaround and shipping.
- ✓ **Tested and Proven Performance.** Exhaustively tested by our in-house labs to ensure performance against thermal runaway events.
- ✓ **Trusted Reliability.** Trusted through recall and recovery events by some of the biggest consumer electronics companies in the industry.

Safe and Easy to Use

Doesn't require a dangerous goods professional to ship in most cases, even with damaged or defective equipment.

DOT Special Permits

SP-16011 permit for the safe transportation and return of lithium-ion batteries, whether they're kept inside or outside of equipment.

Regulatory Compliance and Expertise

We are the industry experts - we actively participate in the regulatory writing process and assist regulatory bodies in the implementation.

Providing **INNOVATIVE SOLUTIONS**
to complex problems

Americase is in the business of creating innovative, problem-solving protection containers based on smart, practical thinking. We provide complex but effective answers to your lithium-ion battery shipping challenges so you can be sure each battery ships and arrives safely.

SOLUTIONS

✓ If our quick-to-deliver solutions don't meet your needs, we can provide custom-engineered solutions to fit your specific requirements.

Our Industry Expertise for Your Peace of Mind

We are the industry experts. We don't just research the industry standards and regulations; we actively contribute to the writing process and assist regulatory bodies in the practical application of these requirements. When you use Americase, you get the peace of mind that your hazardous materials, dangerous goods, or high value products, will be safely transported, stored, and moved through your manufacturing and supply chain with the complete confidence that you meet all current, and upcoming known regulations.

Full Suite of Lithium-Ion Shipping & Recall Solutions

Our deep understanding of regulatory compliance has given us the expertise to design our suite of solutions that meet regulations and provide our customers with the confidence that their products, DDR or not, will ship safely.

Battery Bag

The convenient solution created to be quickly distributed to customers for easy and safe returns. **Battery Bag capacity:** Sized to accommodate mobile phones, tablets, and laptops; batteries under 1500-watt hours only. Custom bag sizes for large quantities also available.

Battery Box

The custom containment solution for specialty batteries that are too large for the battery bag but do not require the capacity of the Battery Super Box. **Battery Box capacity:** Any battery size up to 36 kg and below 1500-watt hours.

Battery Super Box

The most robust, thermally protective lithium-ion containment and shipping solution available on the market today to ship batteries. **Battery Super Box capacity:** Any battery size up to 399.9 kg and below 5600-watt hours.

With 50+ years of case design and manufacturing experience, a full in-house design and engineering department, precision fabrication, and one of the best production units in the industry, we offer the solutions to complex problems and capability to overcome any challenge.
